Satellite radio has been a Godsend for me. I can no longer stand to listen to over the air radio due to constant DJ ramblings, non stop commercials and corporate playlists. If I choose to pay for this service the NAB should have no right to tell me what I can or can not listen to.

XM's Instant Traffic and Weather provides for a great service for it's "paying" listeners. If I can have the option to listen to this in my locale over satellite radio then the NAB should not have the right to take this away from me. Let them compete. Let them counter with their own programming, but do NOT let them win by "tying the hands" of the SDAR companies.

Satellite radio is here to stay, let it grow. Let it evolve, it will be in the best interest for consumers. Let the competition begin for listeners....
